

# Model 1 VA7 Procedure

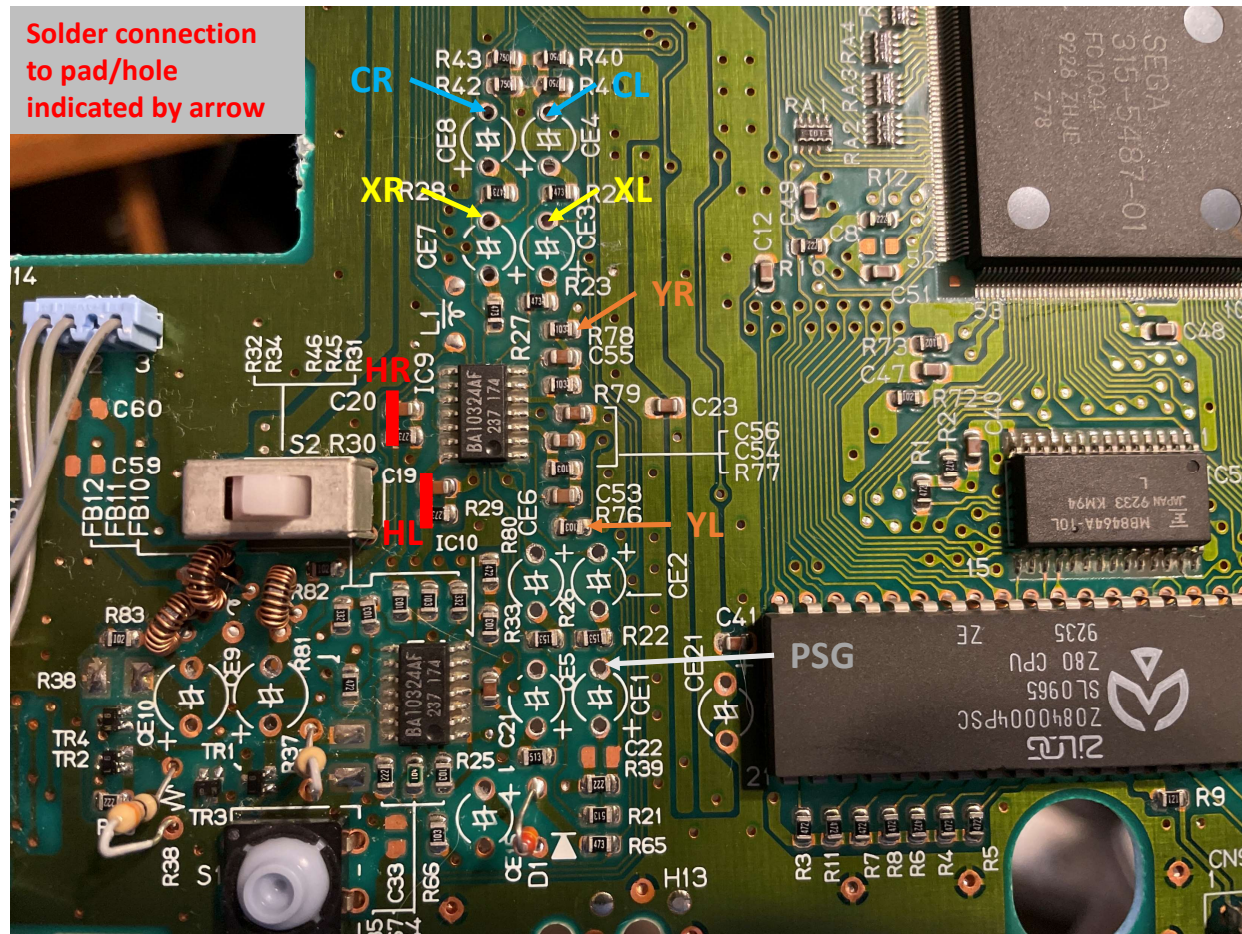

# Model 1 VA7 – Audio – Component Removal

Removing IC9  
is optional,  
but  
recommended

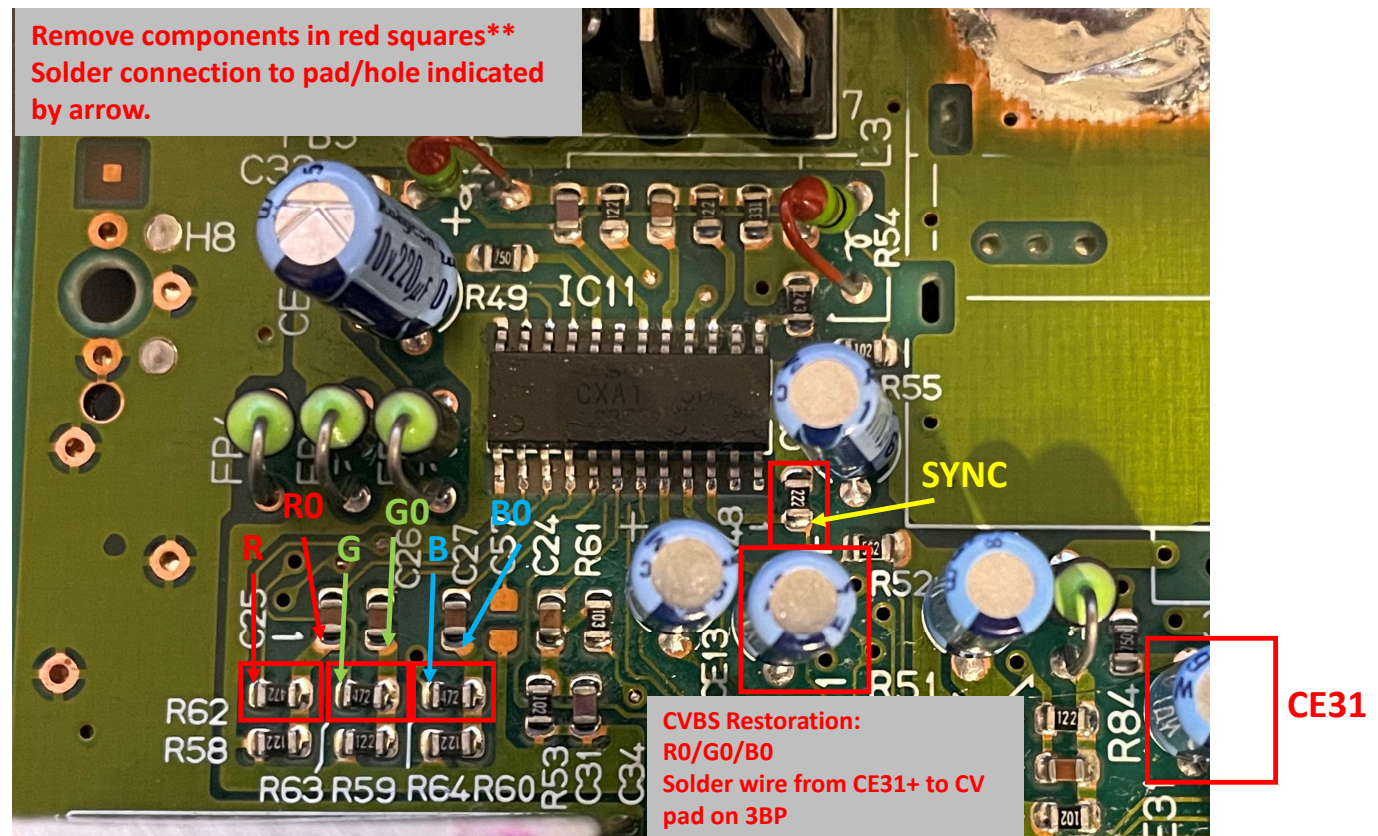

# Model 1 VA7 – Audio – Signal Points

# Model 1 VA7 – Video Connections

# Model 1 VA7 – Supply Voltage

- Solder a wire from the “O” (output) pin of the 5V regulator to the 5V pad on the 3BP to complete the installation

# Model 1 VA7 – 3BP Jumpers and Wrap-Up

- **\*\*\*If re-using the RF shield, remember to bend/cut any points that may contact the 3BP\*\*\***
- Following this guide, the jumpers on the back aren't correct. Use the following jumpers:
  - S75
  - 2
- The other jumpers are unnecessary for this model using this guide.

# M1VA7 – Installation Complete w/ CVBS Restore and Headphone Restore
